

INDUSTRIAL VACUUM CLEANER SYSTEM

NEW

GS 2/50 FM OPT OIL

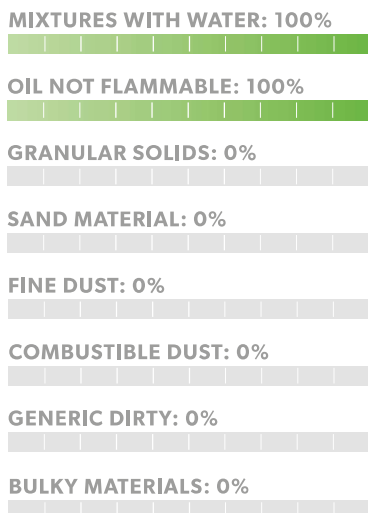

Designed with 2 high speed motors and exclusive technology for high vacuum performances, this model facilitates the recovery and the disposal of materials, thanks to the sieve basket that allows to separate liquids from solids. The sturdy framework equipped with detachable tank and drain valve is provided with a visual filling indicator to monitor the collection of debris in total safety. The tangential metal inlet is abrasion resistant and the internal filtering chamber protects the washable class M cartridge, installed to stop exhalations before they reach the motors.
